## PART 1 INTRODUCTION ..... 1

---

- 1**    ***iText: when and why***    **3**
- 1.1   The history of iText    5  
      *How iText was born*    5    *iText today*    7  
      *Beyond Java*    9
- 1.2   iText: first contact    10  
      *Running the examples in the book*    11  
      *Experimenting with the iText toolbox*    12
- 1.3   An almost-true story    14  
      *Some Foobar fiction*    15    *A document daydream*    16  
      *Welcoming the student*    18    *Producing and*  
      *processing interactive documents*    23    *Making the*  
      *dream come true*    28
- 1.4   Summary    29

## 2 **PDF engine jump-start 30**

### 2.1 Generating a PDF document in five steps 31

*Creating a new document object 32 ■ Getting a DocWriter instance 35 ■ Opening the document 37 ■ Adding content 42 ■ Closing the document 46*

### 2.2 Manipulating existing PDF files 48

*Reading an existing PDF file 49 ■ Using PdfStamper to change document properties 54 ■ Using PdfStamper to add content 55 ■ Introducing imported pages 60 ■ Using imported pages with PdfWriter 61 ■ Manipulating existing PDF files with PdfCopy 64 ■ Concatenating forms with PdfCopyFields 66 ■ Summary of the manipulation classes 67*

### 2.3 Creating PDF in multiple passes 68

*Stamp first, then copy 69 ■ Copy first, then stamp 70 ■ Stamp, copy, stamp 71*

### 2.4 Summary 72

## 3 **PDF: why and when 73**

### 3.1 A document history 74

*Adobe and documents 75 ■ The Acrobat family 77  
The intellectual property of the PDF specification 78*

### 3.2 Types of PDF 79

*Traditional PDF 80 ■ Tagged PDF 80 ■ Linearized PDF 81 ■ PDFs preserving native editing capabilities 81 ■ PDF types that became an ISO standard 81 ■ PDF forms, FDF, and XFDF 83 ■ XFA and XDP 84 ■ Rules of thumb 84*

### 3.3 PDF version history 85

*Changing the user unit 86 ■ PDF content and compression 88 ■ Encryption 90*

### 3.4 Summary 95

---

**PART 2 BASIC BUILDING BLOCKS ..... 97**

---

**4****Composing text elements 99****4.1 Wrapping Strings in text elements 100***The atomic building block: com.lowagie.text.Chunk 101**An ArrayList of Chunks: com.lowagie.text.Phrase 103**A sequence of Phrases: com.lowagie.text.Paragraph 104***4.2 Adding extra functionality to text elements 105***External and internal links:**com.lowagie.text.Anchor 106 ■ Lists and ListItems:**com.lowagie.text.List/ListItem 107 ■ Automatic bookmarking:**com.lowagie.text.Chapter/Section 109***4.3 Chunk characteristics 111***Measuring and scaling 111 ■ Lines: underlining and striking through text 112 ■ TextRise: sub- and superscript 115**Simulating italic fonts: skewing text 116 ■ Changing font and background colors 117 ■ Simulating bold fonts: stroking vs. filling 117***4.4 Chunks and space distribution 118***The split character 119 ■ Hyphenation 120**Changing the CharSpace ratio 121***4.5 Anchors revisited 122***Remote Goto 123 ■ Local Goto 124***4.6 Generic Chunk functionality 125***Drawing custom backgrounds and lines 125 ■ Implementing custom functionality 126 ■ Building an index 127***4.7 Making a flyer (part 1) 129****4.8 Summary 134****5****Inserting images 135****5.1 Standard image types 136***BMP, EPS, GIF, JPEG, PNG, TIFF, and WMF 137**TIFF with multiple pages 139 ■ Animated GIFs 139***5.2 Working with java.awt.Image 140**

- 5.3 Byte arrays with image data 143
  - Raw image data* 144 ▪ *CCITT compressed images* 145 ▪ *Creating barcodes* 146 ▪ *Working with com.lowagie.text.pdf.PdfTemplate* 147
- 5.4 Setting image properties 147
  - Adding images to the document* 147 ▪ *Translating, scaling, and rotating images* 151 ▪ *Image masks* 156
- 5.5 Making a flyer (part 2) 158
  - Getting the Image instance* 158 ▪ *Setting the border, the alignment, and the dimensions* 159 ▪ *The resulting PDF* 160
- 5.6 Summary 161

## 6 **Constructing tables** 162

- 6.1 Tables in PDF: PdfPTable 163
  - Your first PdfPTable* 163 ▪ *Changing the width and alignment of a PdfPTable* 164 ▪ *Adding PdfPCells to a PdfPTable* 167 ▪ *Special PdfPCell constructors* 176 ▪ *Working with large tables* 178 ▪ *Adding a PdfPTable at an absolute position* 182
- 6.2 Alternatives to PdfPTable 186
- 6.3 Composing a study guide (part 1) 189
  - The data source* 189 ▪ *Generating the PDF* 190
- 6.4 Summary 192

## 7 **Constructing columns** 193

- 7.1 Retrieving the current vertical position 194
- 7.2 Adding text to ColumnText 197
  - Different ways to add text to a column* 197 ▪ *Keeping paragraphs together* 199 ▪ *Adding more than one column to a page* 201
- 7.3 Composing ColumnText with other building blocks 206
  - Combining text mode with images and tables* 207 ▪ *ColumnText in composite mode* 209
- 7.4 Automatic columns with MultiColumnText 211
  - Regular columns with MultiColumnText* 211 ▪ *Irregular columns with MultiColumnText* 213
- 7.5 Composing a study guide (part 2) 216
- 7.6 Summary 219

---

**PART 3 PDF TEXT AND GRAPHICS ..... 221**

---

## 8 **Choosing the right font 223**

### 8.1 Defining a font 224

*Using the right terminology 225* ■ *Standard Type 1 fonts 226*

### 8.2 Introducing base fonts 231

*Working with an encoding 232* ■ *Class BaseFont and Type 1 fonts 233* ■ *Embedding Type 3 fonts 238* ■ *Working with TrueType fonts 239* ■ *Working with OpenType fonts 243*

### 8.3 Composite fonts 248

*What is Unicode? 248* ■ *Introducing Chinese, Japanese, Korean (CJK) fonts 251* ■ *Embedding CIDFonts 252*  
*Using TrueType collections 254*

### 8.4 Summary 255

## 9 **Using fonts 257**

### 9.1 Other writing directions 258

*Vertical writing 258* ■ *Writing from right to left 260*

### 9.2 Sending a message of peace (part 1) 262

### 9.3 Advanced typography 264

*Handling diacritics 265* ■ *Dealing with ligatures 268*

### 9.4 Automating font creation and selection 271

*Getting a Font object from the FontFactory 271*  
*Automatic font selection 276*

### 9.5 Sending a message of peace (part 2) 279

### 9.6 Summary 282

## 10 **Constructing and painting paths 283**

### 10.1 Path construction and painting operators 284

*Seven path construction operators 284* ■ *Path-painting operators 286*

### 10.2 Working with iText's direct content 294

*Direct content layers 295* ■ *PdfPTable and PdfPCell events 296*

- 10.3 Graphics state operators 303
  - The graphics state stack* 303 ■ *Changing the characteristics of a line* 305
- 10.4 Changing the coordinate system 313
  - The CTM* 313 ■ *Positioning external objects* 316
- 10.5 Drawing a map of a city (part 1) 321
  - The XML/SVG source file* 321 ■ *Parsing the SVG file* 323
- 10.6 Summary 324

## 11

### ***Adding color and text*** 325

- 11.1 Adding color to PDF files 326
  - Device colorspaces* 326 ■ *Separation colorspaces* 328 ■ *Painting patterns* 329
  - Using color with basic building blocks* 334
- 11.2 The transparent imaging model 335
  - Transparency groups* 336 ■ *Isolation and knockout* 338 ■ *Applying a soft mask to an image* 340
- 11.3 Clipping content 341
- 11.4 PDF's text state 344
  - Text objects* 344 ■ *Convenience methods to position and show text* 350
- 11.5 The map of Foobar (part 2) 353
- 11.6 Summary 355

## 12

### ***Drawing to Java Graphics2D*** 356

- 12.1 Obtaining a Java.awt.Graphics2D instance 357
  - A simple example from Sun's tutorial* 358 ■ *Mapping AWT fonts to PDF fonts* 362 ■ *Drawing glyph shapes instead of using a PDF font* 365
- 12.2 Two-dimensional graphics in the real world 368
  - Exporting Swing components to PDF* 368 ■ *Drawing charts with JFreeChart* 371

- 12.3 PDF's optional content 374
  - Making content visible or invisible* 374
  - *Adding structure to layers* 375
  - *Using a PdfLayer* 378
  - *Optional content membership* 380
  - *Changing the state of a layer with an action* 382
  - *Optional content in XObjects and annotations* 384
- 12.4 Enhancing the map of Foobar 385
  - Defining the layers for the map and the street names* 386
  - Combining iText and Apache Batik* 388
  - Adding tourist information to the map* 389
- 12.5 Summary 392

## PART 4 INTERACTIVE PDF ..... 393

### 13 *Browsing a PDF document* 395

- 13.1 Changing viewer preferences 396
  - Setting the page layout* 397
  - *Choosing the page mode* 398
  - *Viewer options* 399
- 13.2 Visualizing thumbnails 401
  - Changing the page labels* 402
  - *Changing the thumbnail image* 404
- 13.3 Adding page transitions 405
- 13.4 Adding bookmarks 407
  - Creating destinations* 407
  - *Constructing an outline tree* 409
  - *Adding actions to an outline tree* 410
  - *Retrieving bookmarks from an existing PDF file* 411
  - *Manipulating bookmarks in existing PDF files* 413
- 13.5 Introducing actions 415
  - Actions to go to an internal destination* 415
  - *Actions to go to an external destination* 417
  - *Triggering actions from events* 418
  - *Adding JavaScript to a PDF document* 420
  - *Launching an application* 420
- 13.6 Enhancing the course catalog 421
- 13.7 Summary 424

## 14 Automating PDF creation 425

### 14.1 Creating a page 426

*Adding empty pages* 426 ▪ *Defining page boundaries* 427 ▪ *Reordering pages* 431

### 14.2 Common page event functionality 432

*Overview of the PdfPageEvent methods* 432 ▪ *Adding a header and a footer* 433 ▪ *Adding page X of Y* 435 ▪ *Adding watermarks* 438 ▪ *Creating an automatic slide show* 440 ▪ *Automatically creating bookmarks* 442  
*Automatically creating a table of contents* 443

### 14.3 Alternative XML solutions 445

*Writing a letter on company stationery* 445 ▪ *Parsing a play* 451 ▪ *Parsing (X)HTML* 456 ▪ *Using HtmlWorker to parse HTML snippets* 458

### 14.4 Enhancing the course catalog (part 2) 461

### 14.5 Summary 463

## 15 Creating annotations and fields 464

### 15.1 Introducing annotations 465

*Simple annotations* 465 ▪ *Other types of annotations* 470 ▪ *Adding annotations to a chunk or image* 474

### 15.2 Creating an AcroForm 475

*Button fields* 476 ▪ *Creating text fields* 482  
*Creating choice fields* 486

### 15.3 Submitting a form 488

*Choosing field names* 488 ▪ *Adding actions to the pushbuttons* 491 ▪ *Adding actions* 496

### 15.4 Comparing HTML and PDF forms 498

### 15.5 Summary 500

## 16 Filling and signing AcroForms 501

### 16.1 Filling in the fields of an AcroForm 502

*Retrieving information about the fields (part 1)* 503  
*Filling fields* 505 ▪ *Retrieving information from a field (part 2)* 508 ▪ *Flattening a PDF file* 510  
*Optimizing the flattening process* 511

- 16.2 Working with FDF and XFDF files 514
  - Reading and writing FDF files* 514 ■ *Reading XFDF files* 517
- 16.3 Signing a PDF file 518
  - Adding a signature field to a PDF file* 518 ■ *Using public and private keys* 520 ■ *Generating keys and certificates* 521 ■ *Signing a document* 523
- 16.4 Verifying a PDF file 529
- 16.5 Summary 532

## 17 *iText in web applications* 533

- 17.1 Writing PDF to the ServletOutputStream: pitfalls 534
  - Solving problems related to content type-related problems* 536
  - Troubleshooting the blank-page problem* 537 ■ *Problems with PDF generated from JSP* 542 ■ *Avoiding multiple hits per PDF* 543 ■ *Workaround for the timeout problem* 545
- 17.2 Putting the theory into practice 550
  - A personalized course catalog* 550 ■ *Creating a learning agreement form* 553 ■ *Reading an FDF file in a JSP page* 559
- 17.3 Summary 561

## 18 *Under the hood* 562

- 18.1 Inside iText and PDF 563
  - Factors of success* 563 ■ *The file structure of a PDF document* 564 ■ *Basic PDF objects* 569
  - Climbing up the object tree* 570
- 18.2 Extracting and editing text 574
  - Reading a page's content stream* 574 ■ *Why iText doesn't do text extraction* 576 ■ *Why you shouldn't use PDF as a format for editing* 578
- 18.3 Rendering PDF 581
  - How to print a PDF file programmatically* 581
  - Printing a PDF file in a web application* 583
- 18.4 Manipulating PDF files 584
  - Toolbox tools* 585 ■ *The learning agreement (revisited)* 587
- 18.5 Summary 590

<i>appendix A:</i>	<i>Class diagrams</i>	591
<i>appendix B:</i>	<i>Creating barcodes</i>	602
<i>appendix C:</i>	<i>Open parameters</i>	618
<i>appendix D:</i>	<i>Signing a PDF with a smart card</i>	621
<i>appendix E:</i>	<i>Dealing with exceptions</i>	624
<i>appendix F:</i>	<i>Pdf/X, Pdf/A, and tagged PDF</i>	630
<i>appendix G:</i>	<i>Resources</i>	638
	<i>index</i>	642

## *preface*

---

I have lost count of the number of PCs I have worn out since I started my career as a software developer—but I will never forget my first computer.

I was only 12 years old when I started programming in BASIC. I had to learn English at the same time because there simply weren't any books on computer programming in my mother tongue (Dutch). This was in 1982. Windows didn't exist yet; I worked on a TI99/4A home computer from Texas Instruments. When I told my friends at school about it, they looked at me as if I had just been beamed down from the Starship Enterprise.

Two years later, my parents bought me my first personal computer: a Tandy/Radio Shack TRS80/4P. As the *P* indicates, it was supposed to be a portable computer, but in reality it was bigger than my mother's sewing machine. It could be booted from a hard disk, but I didn't have one; nor did I have any software besides the TRSDOS and its BASIC interpreter. By the time I was 16, I had written my own word-processing program, an indexed flat-file database system, and a drawing program—nothing fancy, considering the low resolution of the built-in, monochrome green computer screen.

I don't remember exactly what happened to me at that age—maybe it was my delayed discovery of girls—but it suddenly struck me that I was becoming a first-class nerd. So I made a 180-degree turn, studying Latin and math in high school and taking evening classes at a local art school. I decided that I wanted to become an artist instead of going to college. As a compromise with
